Introduction

The project on "Tracking Change in Rural Poverty in Household and Village Economies in South Asia" is being undertaken by International Crops Research institute for Semi-Arid Tropics (ICRISAT), Hyderabad in collaboration with international Rice research institute (IRRI), Manila, Philippines and National Centre for Agricultural Economics and Policy Research (NCAP), New Delhi, India. The project is supported by Bill and Melinda Gates Foundation and aims at understanding the dynamic process for reducing poverty in the poverty-laden agro-ecologies of South Asia by tracking the household and village economies continuously. NCAP is leading the project in Eastern India.

The Eastern India continues to have very high concentration of poverty, both in terms of prevalence rates and total numbers. Reducing poverty in the region has been a major challenge and successful implementation of this project is expected to contribute to improved understanding of the complex poverty dynamism. The NCAP is mandated to focus on the three states of India namely Bihar, Jharkhand and Orissa. The overall objective of the project is to contribute towards evolving appropriate and effective strategies for accelerated poverty reduction in Eastern India.

This document has been prepared for documentation of the household data collected and compiled under Village Dynamics Situation Assessment (VDSA) project by NCAP for the year 2010-11.

Instructions for the Field Investigatorsfor Filling up VDSA Survey Schedules

1. **Village Information Schedule.**
2. **Census Household Schedule**.
   a. *Land Holding*:
      i. How much do you get if you sell (Rs/Acre) – [Dry/Rainfed Land]: Present Value of Land at the Time of Interview.
      ii. How much do you get if you sell (Rs/Acre) – [Irrigable Land]: Present Value of Land at the Time of Interview.
   iii. Convert local units into Acres.
      iv. Definition of Households: The criterion for defining a household is not simply a common Kitchen but also common enterprise.

3. **Employment Schedule.**
4. **Transaction Schedule.**
5. **General Endowment Schedule.**
   b. *How much Land and other assets did you receive when you became head*:
      i. Loan Amount Received as his/her share: What amount of the outstanding loan is the Head directly responsible to pay?
   c. *Household Member Schedule:*
      ii. Number of Years Studied: Number of Passed classes.
      iii. Year of Termination: Year he/she stopped going to School/College.
   d. *Land holding Information:*
      i. Who owns this plot (Member ID): Give the Member ID of the household member who owns the plot.
      ii. Soil Type and Soil Fertility: Both of these to be measured by Scientist.
      iii. Bunding: In case more than two of the codes apply, give both (e.g. 1,3)
      iv. How much do you get if LO/SO (Rs/Acres/years): In case of receipts in Kind, convert to cash and then write.

6. **Monthly Price Schedule.**
7. **Livestock Schedule.**
8. **Plot and Cropping Pattern.**
      i. Sub-Plot: If one plot has two different crops then mark them as 2 Sub-plots
      ii. In case of multiple cropping in one season on the same plot, write the name of the crop in the row below (second row) and in crop-2 column.
      iii. Season Code:
         a. Annual Crop: Crops standing in the field for about 1 year, like sugarcane.
         b. Perennial: Crops standing for more than 1 year.

9. **Cultivation Schedule**.
   i.   Outputs (Main and by-products): Write the name of output corresponding to the operation + the by-product.

Note: Add on Questioner the Name of the Field Investigator and Date of Survey.

PART-2 (Member codes, status codes, survey instruments and master list)
9. INDIVIDUAL MEMBER CODES (###):
001 – 049 Members of the household residing in the village
050 – 059 Members of the household residing outside the village (temporary migration)
060 – 079 Permanent servants (Full time) working with the household
080 – 099 Permanent servants (Part time) working with the household

201 – 249 New members joined the household (birth, marriage and other reason) residing in the village
250 - 259 New members joined and residing outside the village
280 - 299 Guests staying long period with the household (more than three months)

10. STATUS CODES FOR HOUSEHOLD MEMBERS USED IN THE MASTER LIST (#):

Left the HH due to other reason ------------------10

FOR EXISTING SIX VLS VILLAGES:
To match the information with first generation VLS data, same household and individual member codes allocated in the first generation VLS survey (1975-85) are retained in the VDS surveys. Spin-offs of the original households are given the next consecutive number from 200 onwards. For example, say that by 1985 household 50 has spin into four parts, where the first quarter contains the same household head as first generation and second quarter consists of the elder son's family, where the elder son is the head. Third quarter of the family consists of daughter staying outside the village with her husband, father-in-laws and children where son-in-law is the head and fourth quarter consists of second son's family where the second son is the head. Then the first quarter is represented with same household number 50 and the second quarter headed by elder son should be given 200, third quarter consists of daughter's family headed by son-in-law should be given 1000 and forth quarter headed by second son as 201 in Village Dynamics Study in south Asia along with old VLS number 50.

Example:
Old VLS in 1975-85   Household Number allocated in VDSA at present is as follows:
0050   0050 (Same household head)
0050   0200 (First son's family where first son is head)
0050   1000 (Daughter staying outside the village with her family where son-in-law is
                    head)
0050   0201 (Second son's family where the second son is head)
NOTE: The above coding system should be followed in all regions for new villages also if the household divided (spin off) even after 2009.
